Agreement with respect to the claims f) was reached. g) was not reached. h) N/A. Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Discussed possibilities for amending claims to avoid Ling. Possibilities discussed included language excluding mutation in C domain or excluding mutation in YMDD motif in C domain. Looked for support in specification. Specification discusses mutation in "B and/or C", communicating concept of B mutation without C mutation; working examples also include 3 patient samples with mutations in B domain and no mutation in YMDD (e.g Figure 3, 5). This might be sufficient to support claim limitation excluding the Ling double mutants. BJ prefers language such as "further contains a YMDD motif": MM indicated "further contains an unmutated YMDD motif" would be clearer.
